MTH 101 — Elementary Mathematics I

Worksheet — Quadratic Equations

The sum of the interior angles of a triangle is 180 degrees.

A straight line in the plane has the equation y equals mx plus c.

Surds are irrational roots written in simplified form.

Logarithms convert multiplication into addition.

Indices follow the laws of exponents under multiplication and division.

Partial fractions split a rational expression into simpler terms.

A quadratic equation can be written in the standard form ax squared plus bx plus c equals zero.

The binomial expansion gives the coefficients of powers of a sum.

Sets can be combined using union and intersection operations.

Simultaneous equations can be solved by substitution or by elimination.
